

Accumulator Head Blow Molding Machinery

Pet All Manufacturing Inc.'s Can Mold Brand of Accumulator Head blow molding machinery, has met with outstanding success both in the North American and European market places.

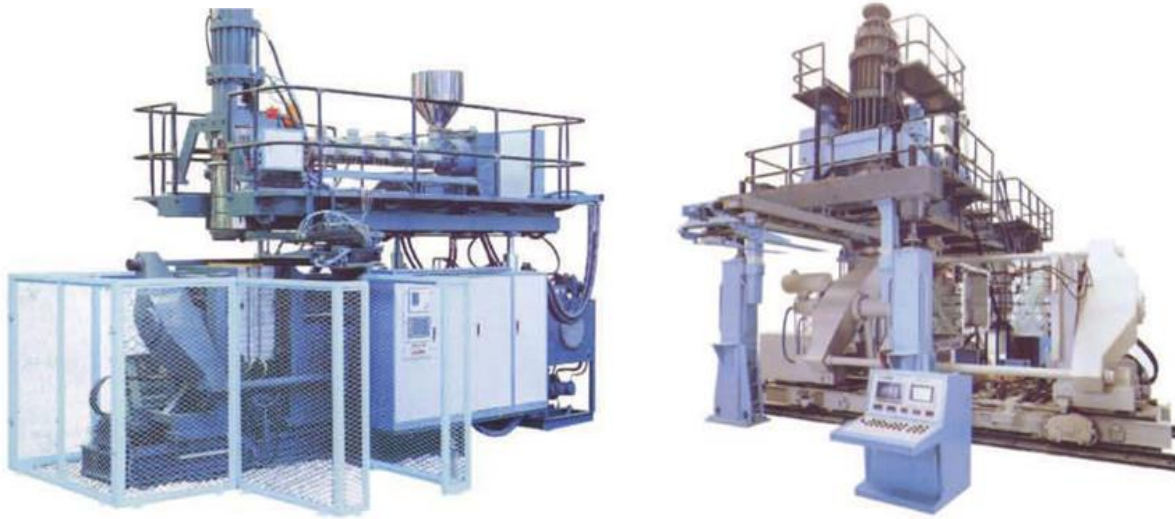

Our success lies in the fact that we offer the largest range of Accumulator Head Machines in the world and our largest machines in platen size are among the largest available anywhere in the world.

The Accumulator Head range covers every single market sector from 7 layer gas tank machines down to 1 litre machines for difficult shapes.

One of the most recent examples of our success is shown in the following article on machines delivered into the industrial chemical tank market.

Pet All has received a number of orders for Accumulator Head Blow Molding Machinery including blow molds focusing on the industrial chemical tank market. Some of the containers are shown above.

A typical machine produces 30-60 of the above containers per hour with a throughput of 240kg / hour HDPE.

The Can Mold Accumulator range offers the most outstanding return on investment available today and is backed up by a team of engineers based in Canada, UK, USA, Mexico, Brazil and Asia.
