

## New IML System for Sports Containers

The Can Mold Phoenix series is of a very high quality range of Blow Molding Machines that cover the entire spectrum from 20 litres down to 2 ounces, and is available up to 16 cavities (2 x 8) as a standard.

A number of specialty machines is available including IML systems for oil containers, specialty machines for wide mouth sports bottles with label insert, small bottle machines in up to 16 cavities to compliment the Can Mold IBM range, plus 50 different models of state of the art extrusion blow molding machines for standard containers such as 5 litre and 1 gallon.

### Gatorade Container

Pet All introduces a machine combination system for blow molding sports bottles, with in-lay, and final in mold labelling.

A special extrusion blow mold, 2 sided machine blows the bottle. A separate hot melt adhesive in mold labelling machine completes the package.

The material for the in-lay is injection molded to the final shape to complete the process.

The Can Mold / Pet All Phoenix Series range offers the most outstanding return on investment available today and is backed up by a team of engineers based in Canada, UK, USA, Mexico, Brazil and Asia.
